>_ ~/properties

Results-oriented Software Developer with experience building AI-integrated web and mobile applications. Proficient in React.js, Next.js, Node.js, TypeScript, and PostgreSQL; experienced deploying on Vercel and cloudbnative platforms.

>_ ~/experience_log

○ Software Developer Intern

@ iViewSense Pvt Ltd.

PRESENT

- Led the design and implementation of scalable web and enterprise applications ensuring high performance, reliability, and security standards.
- Integrated architect systems and optimized backend services to enhance efficiency and support increasing user demand.

○ Developer Intern

@ Compassion AI | LLC

JAN 2025 - JUN 2025

- Built 4 full-stack features for AI-driven SaaS products, integrating Claude API and GPT-4 into Node.js/Express REST services handling 500+ daily requests.
- Reduced average API response latency by 40% by implementing request batching and response caching with Redis TTL on Node.js services.

>_ ~/project_log

○ PokéArena

@ [GitHub](#)

- Engineered a responsive Pokémon battle simulator using Next.js 15, TypeScript, and Tailwind CSS, integrating external REST APIs to render real-time data and visualize statistical comparisons.

○ Phantom

@ [GitHub](#)

- Architected a privacy-first, self-destructing chat application using Next.js and Elysia.js, leveraging Redis TTL for zero-persistence messaging and Zod for strict end-to-end type safety.
